Create the ultimate termite management system with total confidence

Trelona® ATBS is the only baiting system registered and specifically designed to be used in combination with Termidor, providing applicators a solution when the building layout or terrain requires additional protection.

Whether **Termidor® Residual Termiticide and Insecticide** is still your first choice of liquid in-soil treatment or you've upgraded to the advance **Termidor High-Efficiency Termiticide**, it's not always possible to create a continuous treated zone right around a home.

Now, for the first time, you can offer your customers a combined solution that meets the Australian Standard.

As the latest major advance in termite baiting technology, Trelona ATBS complements Termidor perfectly. With its superior bait station design and ultra-effective bait matrix, Trelona ATBS gives you optimal operational flexibility. Choose the 'Active on application' approach to provide year-round protection with fewer inspections.

Termidor® Foam

Termiticide and Insecticide

Termidor® HE

High-Efficiency Termiticide

Trelona® ATBS

Advance Termite Bait System

Termidor® Residual

Termiticide & Insecticide
